

TIME FOR ARCHITECTURE 3
Children's Workshop, Saturday 6th October 2007

Amongst this year's events for Time for Architecture 3 others will be the annual **Children's Workshop**. This workshop will be coordinated by Perit Audrey M. Galea and Ms. Lucienne Ellul BE&A (Hons).

The KTP believes strongly that education is an important element in fostering a society that is aware of the need for quality in the built environment. The proposal for this year's children's workshop is based on the theme of World Architecture Day: **Zero-emission architecture**, and it will seek ways in which sustainability can be explained in simple and effective terms such that children may realise the importance of the built environment and its contribution to a greener environment.

This workshop will be offered to a group of **15 children**, aged between 9-14. It will be held at St. James Cavalier in Valletta on Saturday 6th October from 9am to 12.30pm. The work done throughout the morning will also be exhibited during the Notte Bianca celebrations that will be held during the evening of that same day.

Periti who are interested in sending their children to participate to this workshop are to contact KTP (Mr T Cassar) on Tel/Fax: 21314265 (mornings only) or email kamratalperiti@nextgen.net.mt by **Thursday 20th September**. Participation is free of charge but allocation of places will happen on a first come first served basis.
